Art Unit: 2818

## **Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:
 Group I: Claims 1-19, drawn to semiconductor device(s), classified in class 257, subclass 532.

Group II: Claim 20, drawn to method(s) of manufacturing semiconductor device(s), classified in class 438, and subclass 957.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by other and materially different processes from those of the group II invention. For example, the device(s) of group I can be made by method wherein the first electrode being formed and etched successfully, then the dielectric layer being formed and etched successfully on the first electrode, and then the second electrode being formed and etched on the dielectric layer, instead of forming all three layers then performing the etching processes after that as stated in the group II invention.

Application/Control Number: 10/663,340 Page 3

Art Unit: 2818

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and

restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed

petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

5. A telephone call was made to Mr. Mark M. Abumeri on 03/25/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Application/Control Number: 10/663,340

Art Unit: 2818

7. A shortened statutory period for response to this action is set to expire 1 (one)

month and 0 (zero) day from the day of this letter. Failure to respond within the period

for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).

8. Any inquiry concerning this communication from the examiner should be directed

to Dao Nguyen whose telephone number is (571)272-1791. The examiner can normally

be reached on Monday-Friday, 9:00 AM - 6:00 PM. If attempts to reach the examiner

by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached

on (571)272-1787. The fax numbers for all communication(s) is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0956.
